

CDL & INFOAGE SCIENCE AND HISTORY MUSEUM PRESENT

Software Development using AI

A new class from the Computer Deconstruction Laboratory

5 Wednesday Nights | 7–10 PM | Tuition \$300

Sept 23 · Sept 30 · Oct 7 · Oct 14 · Oct 21, 2026

WHO IT'S FOR

Experienced software developers who want to add AI to their toolkit. Typical experience with a high-level language such as C, C++, or Python is expected.

WHAT YOU'LL LEARN

The class focuses on Claude Code, but the skills taught are reusable with other AI systems. You'll also learn how to protect your work from AI hallucinations.

This class will NOT cover "Vibe" coding for non-programmers.

SCHEDULE

Session 1 – Wed, Sept 23, 2026
Session 2 – Wed, Sept 30, 2026
Session 3 – Wed, Oct 7, 2026
Session 4 – Wed, Oct 14, 2026
Session 5 – Wed, Oct 21, 2026

7:00 – 10:00 PM
7:00 – 10:00 PM
7:00 – 10:00 PM
7:00 – 10:00 PM
7:00 – 10:00 PM

YOUR OWN PROJECT

Students are encouraged to build a project of their own as part of the class. Two suggested project lists (microprocessor development and general development) are posted on GitHub — or bring your own idea.

CLASS MATERIALS & PREREQS

Materials: github.com/Computer-Deconstruction-Lab/Software_Development_using_AI

Before class, review [AI_prerequisites.pdf](#) on the GitHub site to set up your Windows laptop.

LOCATION

Learning Center, Building 9059
InfoAge Science and History Museum
2201 Marconi Road
Wall, NJ 07719

TUITION & RSVP

\$300 by check or cash, collected at the first class. Tuition covers the cost of using InfoAge facilities.

Please indicate your intention to attend by posting under this class's announcement on the CDL discussion site (groups.io/g/cdl/topics) or CDL's Meetup (meetup.com/compdecon).

INSTRUCTORS

Neil Cherry, BS-CS | **Joseph E. Wilkes**, PhD-EE

Both instructors have extensive experience developing software for work and hobby projects.
